Poster Printing

Make a big impression with posters from Imagaprint. Whether you are looking for a window display, point-of-sale posters or simply want your favourite image on a canvas, we can help.

Posters are a simple and cost-effective way to help you deliver your message on a large scale and with stunning impact. Combine this with innovative and dynamic design and you've got a winning formula.

Sizes

We can print posters up to A0 in size, and even up to 100cms wide by 30m long. If you have a specific size in mind please just let us know and we will be pleased to help.

Paper types

Matt coated

Used for most poster applications.

Semi-gloss (satin)

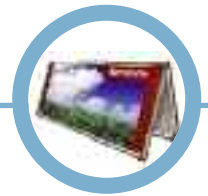

Ideal where reflections from windows or lights are an issue, but where a high quality reproduction is still required.

Gloss coated

For high resolution photographs.

A Boards

Attract customers into your store with our range of A Boards. Various sizes are available. We can produce a new graphic for you as frequently as you like.

Window Display Graphics

Use your window to capture the attention of passers-by. Vivid, eye-catching prints are possible and come with an easy-to-apply, low tack replaceable and repositionable adhesive and liner.

Canvas

Create your own masterpiece by having a favourite photograph printed on our high quality canvas. We can either supply the printed canvas for you to hang as you wish or we can stretch the canvas onto frames which are then ready to hang - the choice is yours.

A choice of photo-editing effects are also available.

Outdoor Signage

Need banners for an outdoor event? We can supply banners, complete with eyelets, to withstand all of the vagaries of the British weather.

Pop-Up Stands

If you're looking to make a really big impact, our pop-up stands are the ideal solution. Infinitely flexible, you can change the panels as often as you like.

The frame is erected in minutes and clip-on magnetic bars are used to ensure the stand is stable. The graphic panels are then hung on to hooks at the top of the frame and attach to vertical magnetic bars.

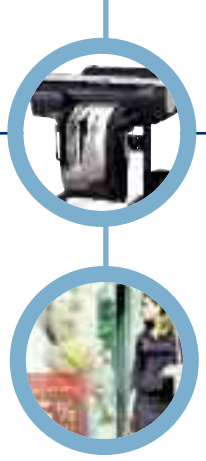

These stand systems are available in a range of widths and heights and can be joined together to make an even more impressive display. Both curved and straight options are available.

A range of halogen and spot lights are available to give the finishing touches to your stand.

Despite packing an awesome graphics punch, these stands can easily and safely be transported from exhibition to exhibition in a tough, hardwearing case, supplied with every stand. The case provides first-class protection for your pop-up and graphics while in transit. For ease of use they come complete with wheels.

Mounting & Finishing Options

To keep your graphics in pristine condition for longer we offer a wide range of finishing and mounting options.

- **Encapsulation**

Completely seals your prints to prevent moisture and other airborne pollutants reaching the image. Heat sealed edge around the graphic.

- **Lamination**

Provides a thin film over your poster to reduce damage from scuffing or fingerprints. Can be single or double sided.

- **3mm Rigid PVC**

Tough, durable backing substrate for all display graphics. Allows graphics to be re-used over several seasons by giving the print rigidity. Ideal if the graphics are going to be frequently handled. The print is laminated to give extra protection.

- **5mm Foam Board**

Lightweight foam board, providing rigidity to the poster - often used for exhibition graphics. Not as durable as the 3mm rigid PVC, but ideal where you want to keep the weight of the graphic panel down to a minimum.

- **Postal Tubes**

Protect your graphics with a postal tube for easy transport. We can supply a range of different sizes.

Tension Banners

These banners are easy to use and simply click onto the pole provided. When finished with, the graphic is rolled up and stored separately.

These banners are hugely popular – and it's easy to see why. You can change the graphic as often as you like by simply opening the snap-on rail and slotting in a new message.

These banners can be seamlessly connected together to give unbroken graphics of almost any width – easily transportable and very cost-effective.

A range of widths are available, call for details.

Comes complete with carry case.

Roller Banners

Roller banners are ideal where the graphics are going to be moved and used on a regular basis. The graphic rolls into the base of the stand when not in use. This helps prolong the useful life of the graphic and makes it ideal for transporting it from exhibition to exhibition.

We offer a range of roller banners depending upon your budget and how you want to use the graphic.

Bronze

For one-off displays, or where the message is short-lived, our bronze range is ideal, especially where budgets are limited. Made of lighter weight aluminium than our silver and gold options, these stands have swing-out feet for stability and are available in a range of different widths.

Silver

Our most popular range. Ideal for when the stand is going to be used on a regular basis, they offer great value for money. They are simple to use, lightweight and very well constructed.

The stands have swing-out feet for stability and come complete with a good quality carrying case. Various widths are available.

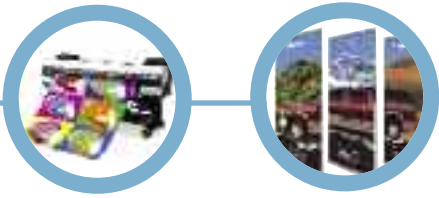

Gold

For total display flexibility our top-of-the range stands are real display winners. If your business revolves around attending exhibitions on a regular basis, these stands are built to last.

The weighted base is designed for a low centre of gravity, without the need for additional support feet. Ideal where stand space is at a premium. On some of our models, graphics can be displayed on both sides of the stand to double the visual impact.

Whatever your need and budget we have a wide range of stands for all your exhibiting needs. We'll guide you through the best options for you to make sure you "look the business".

Design Service

Great graphic design has the power to grab attention and get you noticed. We can design your poster or banner from scratch and even help in sourcing the right images for you. Imagaprint's creative approach will ensure that you always get your point across with maximum impact and memorability.

File Formats

We are able to accept artwork in the following formats:

- JPEGS (300 dpi)
- PDFS
- Quark Express
- Photoshop (.jpg)
- Illustrator (.eps)
- Indesign (.ind)
- Word, Powerpoint & Excel*

* Typically these files can only go as large as A3.
If you save your file as a pdf, much larger sizes are then possible.
We can convert your files to a pdf format if you are unable to do so.
